DEVELOPER
WEB DEVELOPER / Full-Stack

Summary of Qualifications

- **Technologist in Systems Analysis and Development:** Communicative, organized, proactive, and adaptable, with a genuine passion for technology projects;
- **Experience as a Full Stack Developer at IBM,** working with major Brazilian clients such as Bradesco, Santander, Itaú, Sefaz, among others;
- **Strong experience in Front-End and Back-End development,** Databases, consumption and development of REST APIs, CRUD operations, GenAI prompt engineering, and deployment;
- **Solid knowledge of programming languages and JavaScript frameworks,** as well as agile development methodologies;
- **Experience with the IBM product portfolio,** especially WatsonX (AI, Data, Orchestrate), IBM Cloud, and Generative AI;
- Experience in prototyping ideas and hypotheses through MVPs (Minimum Viable Products);
- Experience with deployment on Code Engine (IBM Cloud).

Academic Background

- **Degree in Systems Analysis and Development** — Fatec Zona Leste, Dec 2024;
- Technical High School in Systems Development — Etec Zona Leste, Dec 2022.

Professional Experience

JUSTISecure (Nov 2025 – Now)

Full-Stack Developer

- API development and integrations / Front-End development using React / Creation of a platform to accelerate clients' internal services by automating manual processes / Maintenance of a system for user and product management

IBM TECHNOLOGY – Latin America (Jul 2023 – Jul 2025)

Client Engineering Developer Intern

- Development of B2B solutions following the MVP model / API integrations / Generative AI prompt development / Web application development with React / Creation and maintenance of Virtual Assistants (Chatbots) / Agile methodology (Scrum) / Development and maintenance of reusable assets / Deployment.
- **Bradesco:** Front-end development focused on creating a solution to securely store marketing campaigns for the Bradesco sales team, among other projects.
- **Itaú:** Development of an API to support the retrieval of information related to the audit process, clearly displaying deadlines for findings based on tags selected within OpenPages.

- **Bradesco Seguros:** Use of multiple databases to unlock users on z/OS with Ansible. The role in the project involved implementing automation within Watson Orchestrate.
- **Sefaz:** With the goal of accelerating the analysis of multiple articles to assess eligibility for the Special Tax Regime (RET), an AI-based tool was developed to extract and summarize information in a clear and structured manner.

Student

Main Achievements:

- **Final Course Project in Systems Development at Etec Zona Leste:** Responsible for field research and gathering the information required for application development; programming carried out using React Native; collaboration with the project's designers.
- **Volunteer experience at T.R.E:** Verification of CRUD files built with PHP.
- **Final Course Project at Fatec Zona Leste,** in the Systems Analysis and Development program: Worked on the interface development of a platform for managing academic events, enabling the submission and evaluation of scientific papers, as well as the presentation of approved works.

Technical Skills

Development

- Html, Css, Javascript, ReactJs, NodeJs, Python, FastAPI, Php, Laravel.

Databases

- Firebase, MongoDB, MySQL, PostgreSQL, DB2

Methodologies and tools

- Agile Development (Scrum)
- Code versioning (git/github)
- Requirements Analysis

Software Architecture and Engineering

- API development and consumption
- Knowledge of software architecture patterns
- Understanding of software design principles

AI and automation

- Prompt Engineering

Additional Information

Brazilian, 20 years old, single;

Languages:

- Intermediate English;
- Basic Spanish;
- Native Portuguese.

Additional Courses:

- Scrum Methodology;
- AI Assistants;
- Design Thinking;

- React Fundamentals – OneBitcode, 2023
- Web Applications with Node.js – OneBitcode, 2024

I have Strong writing skills, logical reasoning, ease of teamwork and a Strong sense of collaboration.
